# **IEC 61850 from the user perspective**

**User Recommendation**

December 2012

# Contents

<b>1.</b>	<b>Goal .....</b>	<b>3</b>
<b>2.</b>	<b>Boundary conditions for technical information .....</b>	<b>4</b>
2.1.	Target group .....	4
2.2.	Basis Edition 2 .....	4
2.3.	Limitation to substations .....	4
2.4.	Distribution of functions over several devices .....	4
2.5.	Process bus .....	5
<b>3.</b>	<b>Basic approaches of IEC 60870-5 and IEC 61850 .....</b>	<b>6</b>
3.1.	IEC 60870-5 series of standards .....	6
3.2.	IEC 61850 series of standards .....	6
<b>4.</b>	<b>Comparison of typical elements of IEC 61850 and IEC 60870-5 .....</b>	<b>8</b>
4.1.	Report .....	8
4.1.1.	Buffered option .....	8
4.1.2.	Unbuffered option .....	8
4.2.	DataSet .....	8
4.2.1.	DataSet generated statically per SCL .....	8
4.2.2.	DataSet dynamically generated .....	9
4.3.	GOOSE .....	9
4.4.	Setting Group (SG) .....	9
4.5.	Logging .....	10
4.6.	File Transfer .....	10
4.7.	Controlling switching devices (Control) .....	10
4.7.1.	Different models for controlling switching devices .....	11
4.7.2.	Control hierarchy .....	13
4.7.3.	Control permission .....	14
4.7.4.	Using AddCauses during command execution .....	16
<b>5.</b>	<b>Engineering approaches .....</b>	<b>18</b>
5.1.	Approach: Top-down .....	18

5.1.1.	Specification of system data model .....	18
5.1.2.	Specification of function types .....	18
5.1.3.	Specification of service model .....	19
5.1.4.	Provision of specifications of an IEC 61850 communication system .....	20
5.2.	Approach: Bottom-up .....	20
5.2.1.	Adopting manufacturer-specific IED data models .....	20
5.2.2.	Defining the system data model .....	21
5.2.3.	Defining the service model .....	21
5.3.	Explanation of the individual file sections .....	22
5.3.1.	Substation Section .....	22
5.3.2.	IED Section .....	22
5.3.3.	Data Type Templates .....	22
5.3.4.	Communication Section .....	22
5.4.	Comparison of the engineering processes .....	23
5.4.1.	Top-down engineering process .....	23
5.4.2.	Bottom-up engineering process .....	23
5.4.3.	Conclusion for top-down and bottom-up engineering processes .....	24
5.5.	Transfer of functional naming to flexible product naming .....	24
<b>6.</b>	<b>Implementation of applications .....</b>	<b>26</b>
<b>7.</b>	<b>Illustration using select examples .....</b>	<b>28</b>
7.1.	Basic application concept .....	28
7.2.	Example: interlocking .....	28
7.2.1.	Centralized approach .....	29
7.2.2.	Decentralized approach .....	30
7.3.	Dependency of application implementation on choice of information objects .....	31
7.4.	Dependency of applications on function sequences .....	32
<b>8.</b>	<b>Interchangeability approach .....</b>	<b>34</b>
8.1.	Different operating models .....	34
8.2.	Aspects to take into consideration with interchangeability .....	35
8.3.	Effects of the device structure .....	36
8.4.	Effects of communication elements and parameters .....	37
8.4.1.	Example: GOOSE .....	37
8.4.2.	Example: Parameter confRev .....	37
8.4.3.	Example: Design of DataSets .....	38
<b>9.</b>	<b>Testing (without process bus) .....</b>	<b>40</b>
9.1.	Client-Server .....	40
9.1.1.	Mode state "on" .....	40
9.1.2.	Mode state "on-blocked" .....	40
9.1.3.	Mode state "test" .....	41
9.1.4.	Mode state "test/blocked" .....	41
9.1.5.	Mode state "off" .....	41
9.2.	GOOSE .....	41
<b>10.</b>	<b>Test tools .....</b>	<b>42</b>
10.1.	Introduction .....	42
10.2.	Network analyzers .....	42
10.3.	Test Clients (function testing) .....	42

10.4. Test devices (Test sets).....	43
<b>11. Outlook.....</b>	<b>44</b>
11.1. Topics related to stations.....	44
11.2. General.....	44
<b>12. Appendix.....</b>	<b>46</b>
12.1. Appendix A - Use cases for device replacement .....	46
12.2. Appendix B - Report Controlblocks.....	48
12.3. Appendix C - GOOSE.....	52
12.4. Appendix D - Control .....	53
12.5. Appendix E - File Transfer.....	55
12.6. Appendix F - "Signal mapping" from IEC 60870-5-103 to IEC 61850.....	56
